ELBOWLIFT®
S U S P E N S I O N P A D

**ELBOWLIFT® SUSPENSION PAD
ELBOW PROTECTOR**

1

Instructions for Use **(Note: Review cautions and warnings related to ELBOWLIFT® device before selection and use.**

The ELBOWLIFT® Suspension Pad protects the elbow from pressure ulcers.

Application of the ELBOWLIFT® Suspension Pad:

1. Open up the ELBOWLIFT® Suspension Pad so that the hook-and-loop strap is pulled away from the suspension pad.
2. Place tip of patient's elbow over the centering hole with the foam insert pads aligned under the arm and forearm.
3. Close the strap across the elbow using the hook-and-loop closure.
4. Fit the ELBOWLIFT® so it is not too tight but not too loose by using the Two-Finger Test.

2

Indications for Use of ELBOWLIFT® Suspension Pad

- Prevention of pressure injuries.
- Offloading pressure from the elbow.
- Offload pre-existing wound on the elbow.

- Contraindications
 - Fractures
 - Excessive swelling
 - Infection

3

Cautions

- The ELBOWLIFT® Suspension Pad should be removed every 6 hours to inspect skin or wound status. In case of improper handling, the function and maximum safety of the product can no longer be guaranteed. This aid is intended for single-patient use only.

4

Warnings

- Make sure the ELBOWLIFT® is appropriately applied so elbow is centered over the hole.
- Make sure straps are not too loose or too tight to prevent pressure, shear and friction forces.
- Use under a physician's supervision. Contact physician before applying to the elbow.
- Continue local wound care as prescribed by the attending physician.
- Avoid use of ELBOWLIFT® if allergic to the material.
