

PREMIUM PATIENT REPOSITIONING SYSTEM

PREMIUM GLIDE SHEET

Patient Turning/Transfer Sheet

PREMIUM 30-DEGREE SUPPORT WEDGE SET

Freestanding Patient Positioner, Reusable

Intended Use of the Device*

TurnAssist® is a therapeutic medical device used for assisting the repositioning of patients, who are otherwise unable to reposition themselves, to prevent a pressure injury from occurring at an at-risk area, especially the sacrum.

***NOTE:** Follow your medical facility's protocol and guidelines for repositioning and turning patients.

Indications

- Bedridden patients who are unable to reposition themselves
- Prevention of pressure injuries in a bedridden patient who is at-risk for the development of a pressure injury

Contraindications

- Allergy to material
- Open wound (ulcer)
- Infection

Warnings

- Do not use the TurnAssist® Repositioning System to lift or transport a patient.
- Chlorine based cleaners, hot water washing, and high temperature drying may cause damage to the TurnAssist® Repositioning System and decrease its lifetime.
- **Do not use the TurnAssist® Repositioning System to lift or transport a patient.**

Cautions

- Position properly underneath the patient. Refer to the IFU for proper turning and repositioning instructions.
- Make sure the hospital bed brakes are locked so as to not allow movement of the bed while using the TurnAssist®.
- ***NOTE:** Follow your medical facility's protocol and guidelines for repositioning and turning patients.

Sizing

- Standard Sheet: up to 300 lbs. Weight Limit (34.5 in x 58 in) Standard Wedge: Upper - 18 in x 9 in x 6 in
Standard Wedge: Lower - 14 in x 9 in x 6 in
- Standard Sheet: up to 136 kg Weight Limit (87.63cm x 147.32cm)
- Bariatric Sheet: **Discontinued in 2022** Standard Wedge: Upper - 45.72cm x 22.86cm x 15.24cm
Standard Wedge: Lower - 35.56cm x 22.86cm x 15.24cm

Composition

Materials Specifications:

- Polyurethane Coated Polyester Cloth
- Polyester Mesh Cloth
- Polyester Checked Cloth
- Nylon Thread
- Poly Vinyl Chloride and Polyester Blend Cloth
- Polypropylene Handles
- Polyurethane Foam

Components of TurnAssist® Premium Repositioning System (Incontinence pads not included)*

- One (1) Glide Sheet
- One (1) Large 18" 30° Wedge
- One (1) Small 14" 30° Wedge
- NOTE: Glide Sheet and Wedge sets can be purchased separately

TurnAssist® Features

- The TurnAssist® has a triple-layer glide sheet. The top layer features a durable, fluid proof and antimicrobial material that provides flexibility and reduces shear.
- The middle layer keeps air moving while cushioning the body and redistributing more pressure. The bottom layer is manufactured with micro-holes that allow for greater ventilation.
- Sturdy double-stitched handles that allow for easy four way repositioning.
- 18" upper torso 30° wedge and 14" lower torso 30° wedge customized for application.
- For Single Patient-Multiple Use.

Application (set the brakes on the hospital bed)

1. Place TurnAssist® glide sheet under the patient, placing the top of the sheet just slightly above the shoulders. Place an incontinence pad over the glide sheet for incontinent patients.
2. To offload the sacrum, place the 30° wedges under the glide sheet. Gently turn the patient on their side and fold the glide sheet on top of the patient. Position the larger 18" wedge under the upper torso of the patient just above the sacrum and the smaller 14" wedge under the lower torso of the patient just below the sacrum. Adjust the wedges to maximize support and ensure proper positioning.
3. Check to see the sacrum is completely offloaded by sliding your hand underneath the area of the sacrum.
4. Lay the glide sheet back over the wedges and gently allow the patient to lay back.

Repositioning Patient

1. Gently turn the patient on their side using the TurnAssist® glide sheet and fold the glide sheet over the patient.
2. Hold the wedge handles and remove each wedge from underneath the patient.
3. Gently allow the patient to lay back down flat on the glide sheet.
4. Hold the top handle of the glide sheet with one hand and the appropriate side handle of the glide sheet with the other hand to slide the patient up and down the bed until proper positioning has been achieved.
5. To offload the sacrum, place the 30° wedges under the glide sheet. Gently turn the patient on their side and fold the glide sheet on top of the patient. Position the larger 18" wedge under the upper torso of the patient just above the sacrum and the smaller 14" wedge under the lower torso of the patient just below the sacrum. Adjust the wedges to maximize support and ensure proper positioning.
6. Check to see the sacrum is completely offloaded by sliding your hand underneath the area of the sacrum.
7. Lay the glide sheet back over the wedges and gently allow the patient to lay back.

To Replace Incontinence Pad (Note: Incontinence pads are not included with the TurnAssist® Repositioning System, please consult your medical facility's protocol and guidelines for pad selection and use.)

1. Gently turn the patient on their side using the TurnAssist® glide sheet and fold the glide sheet over the patient.
2. Hold the wedge handles and remove each wedge from underneath the patient.
3. Gently allow the patient to lay back down flat on the glide sheet.
4. Gently turn the patient from side-to-side using the TurnAssist® glide sheet, remove the incontinence pad, and discard the incontinence pad as mandated by your medical facility's protocol.
5. Gently turn the patient from side-to-side using the TurnAssist® glide sheet and place a new incontinence pad underneath the patient.
6. Appropriately reposition the patient and offload the sacrum if indicated as described above under Repositioning.

Instructions for Care (Note: Follow your medical facility's protocol and guidelines on use of disinfectants and safe handling of soiled laundry.)

For Lighter Soils

1. Wipe down the TurnAssist® glide sheet and covered wedges with mild soap and water or with your hospital approved disinfectant wipe/spray.
2. Make sure the TurnAssist® glide sheet and covered wedges are completely dry before using with a patient.

For Heavier Soils

1. Machine wash the TurnAssist® glide sheet and empty wedge covers on delicate cycle in warm water (40°C/105°F).
2. Machine dry the TurnAssist® glide sheet and empty wedge covers in low heat (below 50°C/120°F).

For Foam Wedges

1. Remove foam wedges from wedge covers.
2. hospital approved disinfectant wipe.
3. Launder wedge covers as directed for the TurnAssist® glide sheet above (do not wash the foam inserts).

WARNING: Chlorine based cleaners, hot water washing, and high temperature drying may cause damage to the TurnAssist®.
